

maths paper

Instructions: difficult

Section A

Attempt all questions

1. Solve the equation $x^2 + 5x + 6 = 0$

Difficulty: Hard

Marks: 5

2. Find the derivative of the function $f(x) = 3x^2 + 2x - 1$

Difficulty: Hard

Marks: 5

3. Integrate the function $f(x) = 2x + 1$ with respect to x

Difficulty: Hard

Marks: 5

4. Solve the trigonometric equation $\sin(2x) = 1$

Difficulty: Hard

Marks: 5

5. Find the area under the curve $y = x^2$ from $x = 0$ to $x = 2$

Difficulty: Hard

Marks: 5
